enGene to Present at the Jefferies Global Healthcare Conference

BOSTON & MONTREAL - enGene Holdings Inc. (Nasdaq: ENGN or "enGene" or the "Company"), a clinical-stage genetic medicines company whose non-viral lead program EG-70 is in a pivotal study for BCG-unresponsive non-muscle invasive bladder cancer (NMIBC), today announced that Jason Hanson, Chief Executive Officer, will present a corporate overview at the Jefferies Global Healthcare Conference in New York City, on June 5, 2024, at 12:30 p.m. ET.

A live webcast of the presentation can be accessed under the Investors section of the enGene website at www.engene.com/presentations and will be archived there for 90 days.

About enGene

enGene is a clinical-stage biotechnology company mainstreaming genetic medicines through the delivery of therapeutics to mucosal tissues and other organs, with the goal of creating new ways to address diseases with high clinical needs. enGene's lead program is EG-70 for patients with non-muscle invasive bladder cancer (NMIBC) with carcinoma in situ (Cis) who are unresponsive or naïve to treatment with Bacillus Calmette-Guérin (BCG) - a disease with a high clinical burden. EG-70 is being evaluated in an ongoing Phase 2 pivotal study. EG-70 was developed using enGene's proprietary Dually Derivatized Oligochitosan (DDX) platform, which enables penetration of mucosal tissues and delivery of a wide range of sizes and types of cargo, including DNA and various forms of RNA.
